Vertom Group corporate policy applicability statement

Document number: CRPP.00.012
Date: 15-09-2026
Version: 01

Vertom Group corporate policy applicability statement

1. Purpose

The purpose of this document is to clarify the applicability of the Vertom Group Corporate Policies and to provide an overview of the entities and locations forming part of the Vertom Group.

This statement may be provided together with any Vertom Group Corporate Policy where customers, authorities, certification bodies, industry platforms or other stakeholders require confirmation that a Corporate Policy applies to a specific Vertom Group entity or location.

2. Applicability of the Vertom Group corporate policies

The Vertom Group Corporate Policies are issued at Group level and apply to all entities and affiliated companies forming part of the Vertom Group worldwide, within the scope defined in each individual policy.

The Corporate Policies establish common Group-wide principles and minimum requirements.

Where required by local legislation, certification standards, contractual requirements or the nature of local operations, entities may maintain additional policies, procedures, instructions and controls. Such local requirements shall be consistent with the principles and minimum requirements established by the applicable Vertom Group Corporate Policies.

3. Corporate identity

The Vertom Group Corporate Policies are issued under the Vertom Group name and corporate identity. For this reason, the Corporate Policies carry the Vertom corporate logo and do not necessarily display the individual company names or logos of each Group entity to which they apply.

The absence of an individual entity name or logo on a Corporate Policy does not limit its applicability to that entity.

This statement, together with the entity and location overview below, confirms the relationship between the Vertom Group Corporate Policies and the individual companies and locations forming part of the Vertom Group.

4. Vertom Group entities and locations
